[5 marks]

Nobody knows why we sleep, but we all need to. There are no rules about how much sleep is necessary but the average adult sleeps for 7 hours. About 8% of adults are happy with 5 hours or less and 4% want 10 hours or more. Babies need between 14 to 18 hours whereas the elderly need less than they did when young but often take a nap during the day.

If you miss a couple of hours of sleep, no harm is done. You may feel tired and irritable the next day but the body soon makes up for the loss. If you try to stay awake night after night however, you soon begin to behave strangely. You lose the ability to concentrate and your judgment is impaired. You begin to imagine strange things and your behavior becomes deranged.

There are a number of causes for sleeplessness - worry, depression, illness & pain, noise and light room temperature etc.

Read the questions given below and write the option you consider the most appropriate in your answer sheet:

Q. (4) Read the passage given below very carefully:-

Students in a CBSE school are stress free now. Besides altering several evaluation methods, the CBSE Board will now allow students who do not clear classes IX and X, three more attempts to make the grade before the next academic year begins. If they still fail, the Board could take into account performance in extracurricular activities and sports.

Assessment, too, will be revamped. A child who fares poorly in written exams can be tested orally or via projects, to see if he has understood the concepts. Moreover, the CBSE, which is in the process of making Board exams optional and replacing them with a system of continuous and comprehensive evaluation in class IX and X, now wants schools to show students their answer sheets over the two years and take into account students' feedback before the final grade is given.
